Have a question? Start your search here.

How can I create an email address for my domain?

If you want to create an email address for your Free Domain you need to add an MX record.

To add an MX record, you need to already be using DNS.

To set up your DNS please visit:

https://my.freenom.com/knowledgebase.php?action=displayarticle&id=33

To setup an MX record please follow these steps:

Step 1: Add a new A-record with 'mail' in the 'Name' field.

Step 2: Add the IP address of the mail server in the 'Target' field.

Step 3: Then add a new MX record, leaving the 'Name' field blank.

Step 4: In the 'Target' field add mail.<yourdomain>.<extension> and set the priority to 10.

Please note that it can take up to 72 hours for the changes to take effect.
